COVER · BRAND STANDARDS

# Aumakua Defense

## Where Ancient Protection Meets Modern Precision

Letter brand standards for the prototype. Copper is measured from the logo files. Military green, ink, paper, and the type pairing are proposed and need Mike's sign-off.

13 October 2026. Website by The Tribe Maker.

## Download

PNG files extracted from Mike's mockup. The rough SVG traces are not included and are not for use. Nothing here is recolored.

Brand standards PDF (Letter) | Lockup, copper | Mark, copper

Wordmark, copper | Lockup, white | Mark, white

## Logo

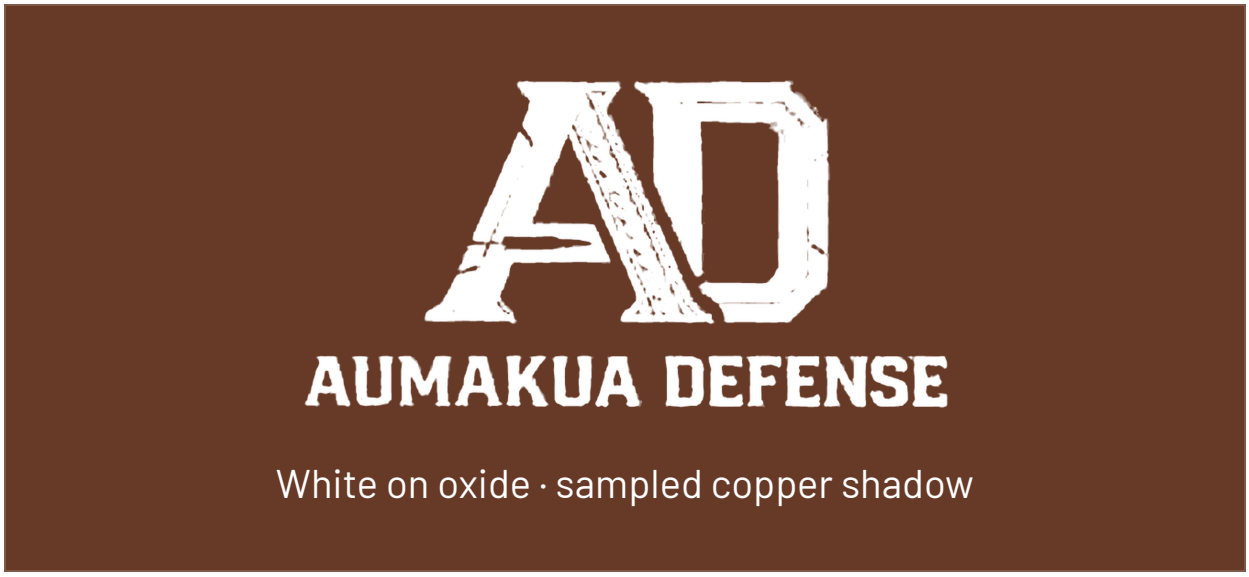

High-contrast tiles only. Copper sits on military green and on ink. White sits on oxide and on military green. The mockup olive wall is not a logo field: copper on that wall fails contrast.

Copper on military green · proposed field

Copper on ink · proposed field

White on oxide · sampled copper shadow

White mark on military green

> Files, as extracted. Transparent PNG. Do not recolor, redraw, stretch, or add effects.

| File | Use | Pixels |
| --- | --- | --- |
| aumakua-lockup-copper.png | Full lockup on dark fields | 2964 × 1588 |

| File | Use | Pixels |
|---|---|---|
| aumakua-mark-copper.png | Mark only, copper | 1932 × 1220 |
| aumakua-wordmark-copper.png | Wordmark only, copper | 2964 × 528 |
| aumakua-lockup-white.png | Full lockup on oxide or deep green | 2964 × 1588 |
| aumakua-mark-white.png | Header mark on military green | 1932 × 1220 |

## Color palette

Copper numbers are measured from the lockup PNG. Military green, ink, and paper are proposed. The olive wall samples come from the build brief's description of Mike's mockup. That mockup file is not in this repo, and those olives are not room colors.

### #C07A5A

**—accent**

Copper mid. Measured luminance median (p50) of opaque warm pixels in the copper lockup. Buttons and 1px jewelry. Ink text on this fill clears WCAG AA (about 5.2:1).

## #673A27

**—copper-shadow**

Oxide. Measured dark copper (near p08). White logo on this field is about 9.5:1. Also the link color on paper.

## #DF9A73

**—copper-highlight**

Measured p75. Text and links on military green (about 5.6:1). Mid copper as small text on green does not clear AA.

## #F7BA96

**—copper-bright**

Measured p90. Highlight reference and focus outline. Not a room color.

## #2C3324

**—brand** PROPOSED

Military green. Deep olive drab, darker than the mockup wall, so paper and copper highlight clear AA. Needs Mike's sign-off. Not sampled from a pixel in the logo (the files are transparent).

## #1A1916

**—ink** PROPOSED

Gunmetal. Text on copper buttons and on paper. Needs Mike's sign-off.

## #F4F0E8

**—paper** PROPOSED

Warm paper for text on green and for this guide. Needs Mike's sign-off.

### #7D7359

NOT A ROOM

Brief sample of the mockup olive wall. Copper mid on this is about 1.4:1. Do not use it behind the mark or behind text.

### #8A795D

NOT A ROOM

Second brief sample of the mockup wall. Same restriction. Reference only.

> The brief's starting copper samples were about #B87350 mid, #5B362D shadow, and #E0A784 highlight. The PNG measures slightly lighter at the median. This guide uses the file measurement. Those brief figures stay here as the approximation, not as a second palette.

## Typography

PROPOSED Stencil-free. Saira Condensed for display, to echo the squared industrial wordmark without redrawing it. Barlow for body. Both are Google Fonts stand-ins until a licensed face is chosen.

Display

# Where Ancient Protection Meets Modern Precision

Body · 1.25rem / 1.6

Barlow at 20px on a 1.6 line. UI text does not go under 16px. Buttons are at least 48px tall.

> Do not set the wordmark in a font. The wordmark is the PNG. Saira Condensed is for headlines we set in HTML, not a replacement for the logo.

## Buttons

Copper is the jewelry. The primary button is ink on copper mid. A second button is a 1px line. Targets are at least 48px.

View the shop | Contact | Unavailable

### Primary

Fill #C07A5A. Label #1A1916. Hover fill #DF9A73. No shadow on the button itself.

### Line

Transparent fill, 1px ink border on paper, 1px rgba(255,255,255,.16) border on military green, paper label.

## Voice and tone

The only published lines are the name and the tagline. Everything else on the prototype is marked draft or client to supply. This voice is proposed.

### Sound like

- Direct, short, and physical.
- The tagline, unchanged: “Where Ancient Protection Meets Modern Precision.”
- Name the business Aumakua Defense, as published.
- Say when a price, photo, or policy is missing.

### Leave out

- Invented prices, reviews, years, certifications, or stats.
- FFL, shipping, or legality claims.
- Hawaiian words the client has not supplied. The name itself is fine.
- The live meta line “expert defense services.” That page is a coming-soon placeholder.
- Emoji. Use the line icons.

## Usage rules

## Do

- Use the five PNG files. Keep them transparent and unaltered.
- Put copper on military green or ink. Put white on oxide or military green.
- Keep military green as the room. Use copper for buttons, 1px lines, and the mark.
- Mark proposed colors and proposed type until Mike signs off.
- Leave clear space around the lockup at least the cap-height of the wordmark PNG. This clear-space rule is proposed.

## Do not

- Recolor, redraw, outline, or set the mark in type.
- Use the rough SVG traces.
- Place the copper mark on #7D7359 or #8A795D.
- Set #C07A5A as small text on paper or on military green. Use oxide on paper, and copper highlight on green.
- Paint a room in copper. Copper is jewelry, not wall paint.
- Add tiki, hibiscus, leis, or other clip-art. A thin weave divider, echoing the band in the mark, is the only pattern.
